Change Detail	
Description of Change	Raytec are announcing that, with immediate effect, the colour of front covers used on the SPARTAN SPZ-BL24 & WARRIOR SPI-BL24 will be RAL9006 This change standardises the colour used across the entire BL24 range. See Appendix 1 for images of affected products before and after the change.
Reason for Change	Product Standardisation. This change simplifies the supply chain, allowing Raytec to hold stock of a single material used across a range of finished parts. This in turn means the business can be more flexible to short lead time and pull in requests
Implementation Plan	Any open orders of the affected parts will be honored but any new orders will be manufactured using RAL9006 front covers. Website, datasheets & literature will be updated in due course.
