Change Detail	
Description of Change	Raytec are announcing the end of life of the VARIO2 IP-W16 & IP-I16 illuminators
Reason for Change	Product upgrade & product line rationalisation. The introduction of the new VARIO2 IPPoE W16 & I16 enables customers to maintain network functionality while allowing the flexibility to power the illuminator using 24VDC or power over ethernet. Whereas the IP16 was 24VDC only.
Implementation Plan	Product is end of life with immediate effect. Last time buys are possible depending on stock levels. Please contact your local sales representative to discuss this on a case-by-case basis.
Recommendations	Customers should order products from the new VARIO2 IPPOE 16 range as a drop in alternative and are encouraged to contact their local sales representative to discuss. A list of cross references can be found in appendix 1.
