

Declaration of Conformity

Regulation (EU) 2025/40 on Packaging and Packaging Waste (PPWR)

Issue	Issue 1
Issue date	29.09.2026
Regulation	Regulation (EU) 2025/40

1. Identification

This declaration applies to the packaging used for the Raytec Ltd product ranges identified in section 4 and supplier compliance records held by Raytec Ltd.

2. Manufacturer

Raytec Ltd
Unit 15, Wansbeck Business Park
Rotary Parkway
Ashington
Northumberland
NE63 8QW
United Kingdom

3. Responsibility

This Declaration of Conformity is issued under the sole responsibility of the manufacturer, Raytec Ltd.

4. Object of the declaration

The object of this declaration is the packaging used for the Raytec Ltd product ranges listed below. The packaging comprises the materials identified within Raytec's supplier compliance records.

Products covered by this declaration

Range	Scope
Vario2	All Vario2 products including accessories
Vario2 PoE	All Vario2 PoE products including accessories
Vario2 IP PoE	All Vario2 IP PoE products including accessories
Vario2 PSU	All Vario2 power supplies
PSTR/VCT/VTR/VTs	All Transport products including accessories
SPARTAN	All SPARTAN Hazardous Area products including accessories
WARRIOR	All WARRIOR products including accessories
URBAN	All URBAN products including accessories

5. Conformity

The packaging identified has been assessed against the applicable requirements of Regulation (EU) 2025/40 of the European Parliament and of the Council of 19 December 2024 on packaging and packaging waste (PPWR), which applies generally from 12 August 2026.

Based on the conformity assessment and technical documentation held by Raytec Ltd, this declaration covers the applicable requirements of Articles 5 to 12 of the Regulation for which conformity assessment obligations apply at the date of this declaration. Requirements with a later application date will be incorporated, and this declaration reviewed and reissued, as they become applicable.

Under Article 5(4), the combined concentration of lead, cadmium, mercury and hexavalent chromium in the packaging does not exceed the 100 mg/kg threshold set by the Regulation. Based on the information supplied to Raytec, Raytec is not aware of anything arising from that assessment that would call the packaging's conformity into question.

Article 6(1), requiring packaging placed on the market to be recyclable, applies from 12 August 2026. In accordance with the European Commission's guidance on the transitional application of Article 6 (Commission guidance document C(2026) 3702 final of 5 June 2026), until the design-for-recycling requirements under Article 6(2)(a) become applicable, compliance is assessed against the applicable requirements of Directive 94/62/EC and related harmonised standards, including EN 13430:2004. The Article 38 and Annex VII conformity assessment procedure for recyclability will be incorporated into Raytec's conformity assessment once the relevant delegated act or acts under Article 6(4) enter into force.

6. Standards and technical specifications

Conformity has been assessed using supplier declarations, packaging composition information and supporting supplier test data held within Raytec's technical documentation.

Where applicable to recyclability during the transitional period under Article 6, assessment is made with reference to the requirements of Directive 94/62/EC and relevant harmonised standards, including EN 13430:2004.

Raytec Ltd has not carried out independent analytical testing of the packaging materials itself. The assessment therefore relies, where applicable, on the accuracy and completeness of information and evidence supplied by Raytec's suppliers.

7. Notified body

No notified body involvement is required for the conformity assessment applicable to the packaging covered by this declaration.

8. Additional information

The identification information required under Article 15 of Regulation (EU) 2025/40, being a type, batch or serial number and Raytec's name, registered trade name and postal address, is provided on the packaging itself. This declaration is provided in addition to that information, to give stakeholders ready access to Raytec's Declaration of Conformity; it is not a substitute for the information printed on the packaging.

Where an importer or distributor places packaging on the market under its own name or trademark or modifies packaging already placed on the market in a way that could affect compliance with the relevant requirements of the Regulation, that importer or distributor shall be considered to be the manufacturer in accordance with Article 21.

This declaration and its supporting technical documentation are retained by Raytec Ltd for the periods required under Article 15(3) of Regulation (EU) 2025/40. This declaration reflects the regulatory requirements and supporting information available at the date of issue, applies only to the product ranges identified, and will be reviewed and reissued where applicable requirements or relevant packaging specifications change.

Signed for and on behalf of Raytec Ltd:

A handwritten signature in black ink, appearing to read 'A. Teardale'.
