SPX-HPFL	SPX-HPFL Datasheet (Gen 1)
SPZ-HPFL	SPZ-HPFL Datasheet (Gen 1)
SPI-HPFL	SPI-HPFL Datasheet (Gen 1)
SPX-HPBY	SPX-HPBY Datasheet (Gen 1)
SPZ-HPBY	SPZ-HPBY Datasheet (Gen 1)
SPI-HPBY	SPI-HPBY Datasheet (Gen 1)

Change Detail	
Description of Change	Raytec have launched an upgraded version of the SPARTAN and WARRIOR High Power Flood range. With the introduction of the new range, existing SPARTAN and WARRIOR High Power Flood and Bay luminaires are being discontinued.
Reason for Change	The new product range delivers a range of benefits over the existing versions, including upgraded power and efficacy, a wider range of optics, as well as being easier to install and maintain. Further details on the new products can be accessed via the links below: New SPX-HPFL Product Page New SPZ-HPFL Product Page New SPI-HPFL Product Page
Implementation Plan	The new range of High Power luminaires was launched on 07/10/26. The existing product range has been discontinued with immediate effect. Please see page 2 of this document for a full list of discontinued part codes. Raytec will continue to support customers with existing installations through spare parts availability for the discontinued range, or equivalent units from the new range.
Recommendations	The new High Power Flood range has been designed to provide direct equivalents to the existing variants where possible. We recommend transitioning to the new range for all new projects and specifications. Customers with active projects where Gen 1 products are already specified, or with a requirement for Bay versions, should contact their Raytec representative. We will review these situations individually and advise on the most appropriate path forward.
